

PAULA STOKOWSKA

phone: (+48) 506-012-228

email: paulastokowska@wp.pl

My website: <https://paulastokowska.netlify.com/>

Hi, I'm Paula!

No, not Paulina (a very popular name in Poland) and not Paola (The Queen of Belgium). Maybe I'm not great with frameworks but I can learn. Or ask fellow seniors.

... and I am an advanced user of Google, Stack Overflow and You Tube tutorials called "Become a new Steve Jobs in one week".

.... and I can dress according to the dress code - all in all I like elegant dresses.

I want to work with creative people who can think out of the box because I am an ambitious, determined and hardworking people who know that success is in the details.

In my career as a developer I would like to become a senior automatic tester or a software developer.

Currently I am focusing on learning Selenium, Python and I am preparing to pass the ISTQB certificate.

I will be more than glad to work with you (it will be actually really awesome, but no pressure).

Experience

Intel Corporation (2017 – CURRENTLY)

UEFI FW (BIOS) Test Developer

Tools: .NET (Visual Studio), Python, Git, JIRA (Agile, Scrum)

BIOS automatic validation coordination on simulation and hardware products

I **designed, implemented and executed hundreds of automatic tests** in C#

I **learned** basic C# and Python within two months and I was able to work alone

I **improved** all existed tests and **increased** the number of tests by three times

I provided **the highest requirements coverage** for my project in our team

I was **managing** a team of subcontractors, introduced them into new projects, provided training, delegating tasks and validating their work in Agile system (JIRA)

I have created stable, indisputable tests based on specifications and client's and dev requirements which were the basis for many bugs found

SONY Pictures (2016 – 2017)

Junior Accountant (Excel, Outlook)

I was responsible for contacts with clients from all over the world

I was creating, validating and providing financial statements for clients

MISYS (2016 – 2016) Internship

I was **testing** the quality and correctness of changes in **the Web UI**

I have **created part of the specifications** in the newly created functionality for clients

MBS Systems (2014) Internship

Creating and **editing** an online store in **HTML**

Education

Master's Degree at Maritime University (2020)

Electric Department (Electronics and Telecommunication)

Undergraduate Studies at Gdansk University of Technology (2017)

Technical Physics and Financial Mathematics Department (Financial Mathematics)

IT College

Computer Science Profile

Skills

- **HTML5, CSS, JS** – creating websites with JS
- **GIT** – very good knowledge
- **C#** - medium knowledge
- **Selenium** – basic knowledge
- **Python** – basic knowledge, simple programs and tools
- **JAVA** – simple apps, sorting, operating on files, basic libraries
- **SQL** – 6 months course, basic knowledge

Testing:

- test acceptance criteria, regression testing, results and proper recording of errors / defects
- comprehensive and well-structured test plans
- prioritizing, planning and coordinating quality testing activities
- white and black boxes testing
- four years of experience with JIRA/Agile/Scrum
- improving fully automated testing process accordingly to BDD principles

Leading:

- experience in managing a group of testers
- providing trainings, implementation process
- reviewing commits
- negotiating payment for completed task
- quarterly assessments

Soft:

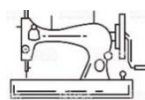

- Excellent communication skills
- Attention to details
- Scientific/mathematical mind and problem-solving aptitude
- Strong organizational skills

Languages:

- English - advanced in reading, writing and speaking
- Polish – native speaker

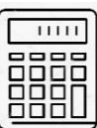

Hobby

Playing the piano and classical music have been my passion since an early age. Many solo concerts and in the school orchestra are my most beautiful memories as well as lifelong friendships.

My new obsession is sewing. Under my mother's watchful eye I learn the process of creating costumes and designing clothes. They are not suitable for wearing yet and they are basically a waste of material but my mother has a lot of it.

Financial mathematics, Global Stock Exchange Market, investments and financial policy have been my hobby for several years. I dreamed to become an actuary and get into the Insurance Industry Business. My BA thesis was about risk theory.

I plan to increase my savings and invest in real estates.

And of course ... pole dancing! Amazing female community, fascinating choreographies and a slender figure - self-confidence at master level guaranteed. I am in intermediate class and cannot wait to start in my first competition!
